Interreg project assessment, monitoring and verification

Certified training, 16 November – 11 December 2026

Overview

This certified training is designed to provide participants with a comprehensive overview of the project assessment, monitoring and verification processes which would allow for projects to be effectively implemented at programme level. The focus of the training is on the daily work of a project and/or finance officer in an Interreg programme.

Who is it for?

The training is mainly aimed at beginners in the field of project assessment, monitoring and verification. It is designed for staff of various programme bodies such as managing authorities and joint secretariats, who want to learn the basics of these specific processes in Interreg project management.

What will I learn?

At the end of the training, learners should be familiar with performing objective assessment of project applications, effectively applying project monitoring and verification methods and links between them. In addition, they should be able to suggest solutions to the most common challenges projects have during implementation and have learned about the different approaches Interreg programmes apply to the same procedures (e.g., 1step - 2step assessment of project proposals etc.)

How long does the training take?

It typically takes 18 hours (within 1 month) to complete all the components of the Interreg project assessment, monitoring and verification certified training.

How do I get my certificate?

We issue your certificate when you have completed all the mandatory components of the training and have successfully completed a simple final task – a knowledge assessment task. Please note that this training involves **an in-person event 8-9 December 2026 in Bucharest, Romania which you must attend.**
